

ROTOBRUSH Air Duct Cleaning

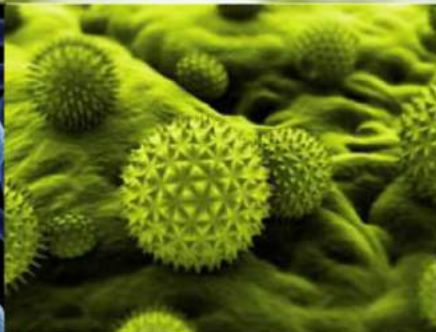

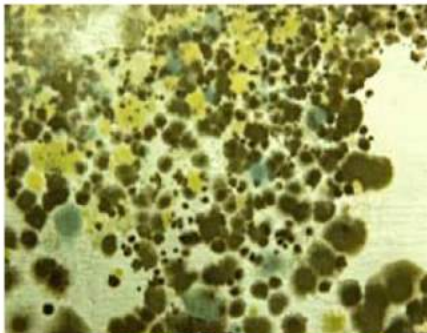

ChooseSanford.com

(603) 769-3956

It's great to have your home sealed tight to save energy and be insulated from the weather, however this can lead to problems in indoor air quality.

Indoor air is 2-5 times worse than outdoor air!

Most household dust contains dust mites, mold, mildew, pollen, and animal dander, and many of these contaminants are recirculated through the central air systems in your home, aggravating respiratory problems such as asthma and allergies.

Get Clean

We clean register covers to remove cooking oil film, nicotine film, and other dust-collecting

Breathe Deep

We deep clean the source of the air supply including supply and return ductwork leading up to the registers, as well as the main supply and return trunk.

Scrub

Air ducts are brush-vacuumed clean with our exclusive, patented ROTOBRUSH Air Duct Cleaning System.

Rotobrush[®]

Air Duct & Dryer Vent System Cleaning

Goodbye Contaminants

The ROTOBRUSH[™] removes pollutants that circulate through the air duct system.

Sanitize

We will sanitize your air ducts and vents with an environmentally safe sanitizer commonly used in hospitals and nursing homes, leaving behind a fresh scent.

Schedule Today!

Indoor Air Quality is a Top 5 Risk to public health, according to the Environmental Protection Agency!

Using the patented ROTOBRUSH[™] Air Duct Cleaning System, Sanford Temperature Control can effectively remove contaminants from your home's duct work. This advanced cleaning method is the only one available that brushes and vacuums at the point of contact, eliminating the use of chemicals and reducing airborne contamination.

The powerful yet flexible ROTOBRUSH[™] easily cleans all types of air duct construction (e.g., flex duct, round metal ducts, square metal ducts, and fiberboard) including right angle turns, reducers and multiple bends found in most types of duct systems.
